

product designers

creating products from ideas

We provide the complete strategic design service from research / concept through to design / development and production.

Established in 1998 Idea Developments' quality design services are backed by 20 years of plastic and product design, graphics and engineering experience. Our quality product designs are sold around the world by a number of leading brand names.

We can now utilise our experience to produce your...

Low Volume
Production

■ Rapid Prototyping (RP)

Custom polymer parts, created without tooling. 3D RP technologies like SLA, SLS & 3D printing provide accurate, economically parts for engineering or aesthetic review

■ CNC Machining

Single parts or short production runs... polymer parts like; ABS, PMMA, POM, PC, PA etc... metallic parts like; alloy, brass, steel etc with high quality polish option

■ Low-Pressure Tooling

Limited production runs of polymer parts with high level of detail and very competitive prices

■ Production Tooling

High quality production tooling and moulding service, complete with QC audits and freight forwarding at very competitive pricing

high finish metals

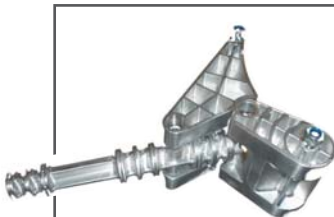

functional electronics

multiple materials

engineering components

complex assemblies

flexible components
